PASSED AUDITS (22) Show

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

CONTRAST

-  Background and foreground colors do not have a sufficient contrast ratio. 

These are opportunities to improve the legibility of your content.

NAVIGATION

-  Heading elements are not in a sequentially-descending order 

These are opportunities to improve keyboard navigation in your application.

NAMES AND LABELS

-  Image elements have `[alt]` attributes that are redundant text. 

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

AUDIO AND VIDEO

-  `<video>` elements contain a `<track>` element with `[kind="captions"]` 

These are opportunities to provide alternative content for audio and video. This may improve the experience for users with hearing or vision impairments.

ADDITIONAL ITEMS TO MANUALLY CHECK (10) Show

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).
